

2007 Annual Report

Fulton County Medical Examiner's Office

Prepared by:

**Randy L. Hanzlick, MD
Chief Medical Examiner**

July 17, 2008

Preface

This Annual Report would not be possible without the dedication and professionalism of the employees who work for the Fulton County Medical Examiner in Atlanta, Georgia. Those who worked here during calendar year 2007 include:

Administrative and Support Personnel

John M. Cross, Deputy Director
Paul Desamours, Operations Manager
Barbara Pringle-Small, Administrative Coordinator
Simone Murphy, Medicolegal Transcriptionist
Lynnette Redding, Medicolegal Transcriptionist
Angela Wright, Records and Documents Supervisor
Karleshia Bentley, Administrative Assistant
Dumonder "Reda" Dawson, Administrative Assistant
Shirley Gleaton, Customer Service
Patricia Mossenic, Customer Service
Tia Baynes, Customer Service Representative

Medical Examiners

Randy Hanzlick, MD, Chief Medical Examiner
Geoffrey P. Smith, MD, Associate Medical Examiner
Michael Heninger, MD, Associate Medical Examiner
Michele Stauffenberg, MD, Associate Medical Examiner
Karen Sullivan, MD, Forensic Pathologist
Stacey Smith, MD Forensic Pathology Fellow
Steven P. Atkinson, MD, Forensic Pathology Fellow

Investigative Staff

Mark Guilbeau, PhD, DABMDI, Senior ME Investigator/Forensic Anthropologist
Tami Schroder, DABMDI, Senior ME Investigator
Mike Alsip, DABMDI, ME Investigator
Meredith Galloway, ME Investigator
Mary Beth Hauptle, DDS, DABMDI, ME Investigator, Forensic Odontologist
Betty Honey, DABMDI, ME Investigator
Teresa Price, ME Investigator
Mark Ruffin, ME Investigator
Jon Hager, ME Investigator
Laura Salm, ME Investigator
Leon Harrison, ME Investigator
Dumonder Dawson, ME Investigator

Forensic Technical Support

Carlos Evans, Forensic Technician
Charles Love, Technician Supervisor
Angie Fuller, Technician Assistant Supervisor
Chefrene, Forensic Technician
Tarris Gaskins, Forensic Technician
Kathy Washington, Forensic Technician
Charri Hill, Forensic Technician
Joe Glass, Morgue Attendant
Glenda Buchek, Medical Lab Technician
Mary Burgess, Medicolegal Photographer
Eric Bailey, Forensic Technician

Custodial Services

Walter Williams

Without the above individuals, quality investigation of deaths in Fulton County would not occur, and neither would professional communication with the many agencies and members of the public who are impacted when a death occurs. These employees also care for and maintain a modern facility in which death investigations may be professionally conducted with respect for the dead and at which members of the public, legal, and law enforcement communities can effectively conduct their business.

I thank the Fulton County Medical Examiner employees— each and every one— for their dedication, excellence, and professional quality death investigations conducted for the citizens of Fulton County. We are proud to be a death investigation center fully accredited by the National Association of Medical Examiners.

It is hoped that the information in this report may be useful to public health, public safety, and other policy and program planners who strive to improve the safety and quality of life. Additional data may be available for specialized studies that go beyond the general data presented in this report.

The medical examiner's office and its personnel "speak for the dead" and our office is a place where "death delights to serve the living." It is with a true sense of civic duty and public service that we conduct our death investigations for the community.

It is now 2008 and this Annual report is for calendar year 2007. It is not uncommon for some death cases to take many months to finalize because of extensive testing or the need for investigative information that takes time to obtain. The Report itself takes time to prepare, and must be done while we carry on our usual activities and death investigations, which also take the time of our staff. We hope to continue preparing our annual report by July of each year, if not earlier.

Randy Hanzlick, MD
Chief Medical Examiner
July 17, 2008

TABLE OF CONTENTS

Preface	2
Section I. Introduction	5
Section II. All Reported Cases	8
Section III. Manner of Death: Accident (Non-Traffic)	10
Section IV. Manner of Death: Accident (Traffic)	18
Section V. Manner of Death: Homicide	22
Section VI. Manner of Death: Suicide	28
Section VII. Manner of Death: Undetermined	31
Section VIII. Manner of Death: Natural	34
Section IX. Special Topics.....	36
Deaths among the Homeless.....	36
Deaths among persons of Old Age.....	38
Deaths among Children.....	43
Deaths caused by Drugs and Poisons.....	45
Procedural Summary.....	54
Comments.....	55

NOTE: Rather than providing large numbers of Tables, Graphs, and Figures, data are presented with an overall summary Table followed by a list of cases with relevant detail. These lists can be used to categorize data in whatever manner a reader/usr wishes to do. More detailed data can be provided by FCME if release of such data is compliant with applicable laws, policies, and procedures.

SECTION I. INTRODUCTION

The Fulton County Medical Examiner (FCME) serves all non-federal, incorporated and unincorporated areas within Fulton County. In 2008, these areas include nearly all of the City of Atlanta, Alpharetta, Chattahoochee Hill Country, College Park, East Point, Fairburn, Hapeville, Johns Creek, Milton, Mountain Park, Palmetto, Roswell, Sandy Springs, Union City, Unincorporated Fulton County, and other areas served by special law enforcement agencies such as MARTA and college police forces. The FCME does not serve the few areas of Federal property within the county such as the Federal Penitentiary which arranges for its own investigations. Under the provisions of the Georgia Death Investigation Act, FCME investigates deaths that are suspected or known as having resulted from external causes such as injury or poisoning, and deaths that are sudden, unexpected, and not explained with a reasonable degree of medical probability. Other selected types of death are also investigated such as those occurring while a person is in custody of law enforcement agencies.

The County covers 529 square miles and has a 2008 estimated population of about 940,000. Countywide, the population is about 48.4% white, 42.3% black, and 8.3% other minorities.

The laws describing the duties of medical examiners in Georgia are contained mostly in Official Code of Georgia Annotated, Title 45, Chapter 16, the "Georgia Death Investigations Act." The types of death required to be reported to the medical examiner include:

- Violence (injury)
- Casualty (accident)
- Suicide
- Suddenly when in apparent good health
- When unattended by physician (no doctor who can sign the death certificate)
- Suspicious or unusual
- Children under 7 if death is unexpected or unexplained
- Executions pursuant to death penalty (these do not occur in Fulton County)
- Inmate of state hospital or state, county, or city penal institution
- Admitted to hospital unconscious and dying within 24 hours without regaining consciousness

Decisions about autopsies are not mandated and are left to the discretion of the medical examiner. As can be seen, the laws are general enough that jurisdiction may be accepted in a wide variety of cases that are not otherwise specified in law, such as sudden death while under anesthesia, which may be considered to be "sudden and unexpected" or "unusual."

When a death is reported to FCME, the case is either **accepted** (AJ) or **declined** (DJ). If a case is accepted, it means that the medical examiner will be signing the death certificate (certifying the death). A case is **declined** for one of two reasons:

- The incidents leading to death did not occur in Fulton County
- The death need not have been reported and there is a physician who is willing to sign the death certificate

A case is **accepted** if:

- It meets the criteria specified by law as described above, and
- The incident leading to death occurred in Fulton County, or
- If the place of incident or onset of fatal events is unknown, the death occurred or the dead body was found in Fulton County

The case medical examiner (forensic pathologist) generally uses one of four approaches to certify a death (obtain information to complete the death certificate):

- **Signout.** The death certificate is signed without examining the body.
- **View.** A cursory examination is performed to further evaluate the case and rule out trauma or the need for further in-depth examination. A few simple case notes may be prepared.
- **External examination.** Formal external examination with a dictated report of the examination, usually including toxicology or chemistry tests as well.
- **Autopsy.** Complete autopsy with dictated report. A **limited dissection** (partial autopsy) is sometimes performed if:
 - there is expressed objection to autopsy or significant health or safety risks exists for staff, and,
 - a complete autopsy need not be performed.

There are basic general "rules" for classifying manner of death:

- **Natural** deaths are due solely or nearly totally to disease and/or the aging process.
- **Accident** applies when an injury or poisoning causes death and there is little or no evidence that the injury or poisoning occurred with intent to harm or cause death. In essence, the fatal outcome was unintentional.
- **Suicide** results from an injury or poisoning as a result of an intentional self-inflicted act committed to do self harm or cause the death of one's self.
- **Homicide** occurs when death results from a volitional act committed by another person to cause fear, harm, or death. Intent to cause death is a common element but is not required for classification as homicide (more below). It is to be emphasized that the classification of homicide for the purposes of death certification is a "neutral" term and neither indicates nor implies *criminal* intent, which remains a determination within the province of legal processes.
- **Undetermined** or "could not be determined" is a classification used when the information pointing to one manner of death is no more compelling than one or more other competing manners of death, in thorough consideration of all available information.

In general, when death involves a combination of natural processes and external factors, such as injury or poisoning, preference is given to the non-natural manner of death.

Budget and Staff

The annual operating budget for 2007 was approximately \$3.7 million. The FCME staff consisted of approximately 39 employees including 5 physician medical examiners, 12 investigators, 10 clerical staff, 3 administrators, 7 forensic technicians and support staff, 2 custodians. We also have 1 forensic pathology physician in training with that position being funded by Emory School of Medicine.

General Response

When a death is reported to FCME, the case is assigned a sequential case number. Basic information is obtained on all cases reported. Investigators, in consultation with the on-call medical examiner as needed, make decisions about whether the case should be accepted or declined, if death scene investigation is required, and whether or not the body need be transported to the Fulton County Medical Examiner's Center. The on-call medical examiner then makes decisions about the type of examination to be conducted and the extent of additional testing to be performed. Usually, bodies transported to FCME are returned to the family and funeral home within 24 hours or less if the body has been officially identified.

For further information about FCME, please see our website at www.fcmeo.org

For further information about medical examiners and death investigation, please see the website of the National Association of Medical Examiners at www.TheNAME.org

Data Source and Analyses

The data herein are derived from the HOMER (Has Our Medical Examiner Records) Access database. In 2007, there were 2238 case reports. Twelve (12) of these records were non-human remains, and four (4) death records were noted to be duplicate records. Thus, after excluding these 16 records from data analysis, there were a total of 2222 unique human death cases for this report.

Race/Ethnicity Categories

Categorizing Race/Ethnicity of decedents has become more difficult because of a growing mixed-race population and because of personal preferences in how Race/Ethnicity is reported by family members.

For our database purposes, we assign race as follows:

B= Black or African American

W= White/Caucasian

WH= White Hispanic/Latino

BH= Black Hispanic/Latino

H= Hispanic/Latino

AS= Asian

PI= Pacific Islander

NA= Native American/Eskimo

Thus, for tabulation of Hispanic/Latino decedents, cases coded as WH, BH, or H would be used.

For decedent age, an H means Hours, D means Days, W means weeks, and M means Months. Thus, a 4-month old would be indicated as M04. Fetus is FET and stillborn is SBN. For all other ages, 3 digits are used. Thus, a 42 year old would be 042.

For any data item, a blank means unknown or that the information was not obtained.

SECTION II. ALL REPORTED CASES

Table 1. Number of cases Accepted (AJ) and Declined (DJ) by Manner of death (n=2222)

Jurisdiction	Manner of Death	Frequency	Percent
AJ	ACCIDENT	275	19.6
	ACCIDENT (T)	121	8.6
	HOMICIDE	182	12.6
	NATURAL	701	49.9
	STILLBORN	2	0.2
	SUICIDE	86	6.1
	UNDETERMINED	36	2.5
	Total =	1403	
DJ		819	
TOTAL		2222	

Table 2. Manner of death by Procedure, cross-tabulated for Accepted (Certified) Cases only (n=1403)

MANNER	PROCEDURE				Total
	Autopsy	External PM Exam	Signout	View	
ACCIDENT*	199	24	46	5	274
ACCIDENT (T)**	114	3	4	0	121
HOMICIDE	180	0	2	0	182
NATURAL	388	176	63	75	702
STILLBORN	2	0	0	0	2
SUICIDE	85	1	0	0	86
UNDETERMINED	36	0	0	0	36
Total =	1004	204	115	80	1403

* Non Traffic-related accidents

** Traffic-related accidents

Table 3. Police Jurisdiction by Manner of death cross-tabulation for all reported deaths (n=2222)

Police Jurisdiction*	MANNER							TOTAL DEATHS		% Accepted	
	NA/DJ (1)	ACCIDENT	ACCIDENT (T)	HOMICIDE	NATURAL	SUICIDE	UNDETERMINED	Reported(4)	Accepted (4)		
Alpharetta	17	6	2	0	13	3	0	41	24	59	
Atlanta	429	150	73	126	412	41	24	1255	826	66

SECTION IV. MANNER OF DEATH: ROAD TRAFFIC ACCIDENTS

Table 7. Motor Vehicle Fatalities organized by race and sex

Traffic Fatalities		
RACE	SEX	Count
B	M	56
W	M	29
B	F	17
W	F	11
AS	M	3
WH	M	2
H	M	2
H	F	1

Total Road Traffic Accidents	121	
Males	92	76%
Females	29	24%
Black	73	60%
White	40	33%
Hispanic/Latino	5	4%
Asian	1	0.8%

Table 8. Traffic Fatality Deaths categorized by driver, passenger, or pedestrian status:

Status	Count
MVA-Driver	47
MVA-Occupant	29
MVA-Pedestrian	22
MVA-MotorcyclistDriver	15
MVA-ATV	2
Train-Commercial	1
MVA-StatusUnknown	1
MVA-Status Unknown	1
MVA-OffRoad	1
MVA-Driver + Train	1
MVA-Bicyclist	1

Table 9. Traffic Fatality Deaths categorized age of decedent:

Traffic Fatalities						
AGE	RACE	SEX	RPT_DATE	INC_DATE	IncZip	Status

SECTION V. MANNER OF DEATH: HOMICIDE

Table 10. Homicide Victims organized by race and sex

Homicides			
RACE	SEX	MANNER	Count
B	M	HOMICIDE	140
B	F	HOMICIDE	15
W	M	HOMICIDE	10
W	F	HOMICIDE	6
H	M	HOMICIDE	6
	M	HOMICIDE	2
WH	M	HOMICIDE	1
WH	F	HOMICIDE	1
AS	M	HOMICIDE	1

Total Homicides	182	
Males	160	88%
Females	22	12%
Black	155	85%
White	16	9%
Hispanic/Latino	8	4%
Asian	1	0.5%
Unknown Race	2	1%

Table 11. Homicide Victims organized by weapon used

Homicides	
Weapon Used	Count
Gun-Not otherwise specified	82
Gun-Handgun	48
Gun-Pistol	12
Blunt Force	10
Sharp Instrument	9
Gun-Shotgun	7
Sharp Instrument-Knife	4
Guns	2
Gun-Rifle	1
Gun-Revolver	1
Sharp Instrument-Knife + Gun	1
Asphyxia-Strangulation	1
Fall-From Height	1
Exposure-Neglect	1
Blunt Force-Chop	1
Gun-Assault	1

Table 12. Homicide Victims ordered by age of victim

SECTION VII. MANNER OF DEATH: UNDETERMINED

Table 16. Cases with Manner of Death Undetermined, categorized by race and sex*

*It is office policy in SIDS-like cases to certify the manner of death as undetermined rather than natural unless another manner of death is identified. “Stressor” indicates some risk factor was present such as soft bedding. “Disease” means that disease was present but significance in causing death is unknown. “Both” means that disease and a stressor were present. “Classic” means that neither disease nor a stressor was identified. “Not SIDS” means that the circumstances were not consistent with SIDS but a specific cause of death was not determined.

Manner of Death Undetermined			
RACE	SEX	MANNER	Count
B	M	UNDETERMINED	14
B	F	UNDETERMINED	13
W	M	UNDETERMINED	4
W	F	UNDETERMINED	2
H	M	UNDETERMINED	1
BH	F	UNDETERMINED	1
		UNDETERMINED	1

Total Undetermined Manner	36	
Males	19	53%
Females	16	44%
Unknown sex	1	3%
Black	27	75%
White	6	17%
Hispanic/Latino	2	6%
Asian	0	
Unknown race	1	3%

Table 17. Manner of Death Undetermined categorized by cause of death

Manner Undetermined	
Cause of Death	Count

ACCIDENT	052	B	F	Toxic effects of cocaine, opiates and other substances			
ACCIDENT	044	B	M	Toxic effects of cocaine use			Pulmonary emphysema
ACCIDENT	034	B	M	Toxicity of opiates (heroin)			
ACCIDENT	047	W	M	Toxic effects of cocaine and opiate use			
ACCIDENT	030	B	F	Combined toxic effects of amitriptyline and methadone			Sickle cell disease
ACCIDENT	041	W	M	Acute methamphetamine poisoning			
ACCIDENT	025	W	M	Combined toxic effects of morphine and ketamine			
ACCIDENT	047	B	F	Toxic Effect(s) of Cocaine			Hypertension
ACCIDENT	053	B	M	Toxic effects of cocaine use			Coronary atherosclerosis
ACCIDENT	026	W	M	Acute cocaine poisoning			
ACCIDENT	059	B	F	Intracerebral hemorrhage	Hypertension	Cocaine use	HIV infection, G6PD deficiency
ACCIDENT	049	B	F	Acute hemorrhagic cerebral infarction with cocaine usage			Hypertension
ACCIDENT	023	W	F	Mixed drug overdose			Early pneumonia
ACCIDENT	036	B	F	Combined toxic effects of cocaine and ethanol			
ACCIDENT	052	B	M	Acute cocaine use complicating chronic ischemic heart disease			
ACCIDENT	046	W	F	Cerebral infarction	Cocaine use		Coronary artery disease, hypertension
ACCIDENT	026	B	M	Cocaine toxicity aggravating atrial fibrillation			
ACCIDENT	038	B	F	Intracerebral hemorrhage with delayed death	Hypertension	Acute cocaine use	
ACCIDENT	047	B	M	Aortic Dissection Aggravated by Acute Cocaine Use			Hypertensive Cardiovascular Disease
ACCIDENT	050	B	M	Cocaine use complicating Hypertension			End Stage Renal Disease
ACCIDENT	055	B	M	Cocaine toxicity			Hypertension; Atherosclerosis; Cirrhosis
ACCIDENT	023	W	M	Positional Asphyxia Complicating Opiate and Cocaine Use			

Deaths Caused by Drugs, Poisons, or Chronic Abuse

MANNER	AGE	RACE	SEX	CAUSE_A	CAUSE_B	CAUSE_C	OS_COND
ACCIDENT	047	B	M	Acute opiate poisoning			Hypertensive cardiovascular disease
ACCIDENT	055	B	M	Cocaine toxicity			Hypertensive cardiovascular disease; Asthma
ACCIDENT	057	W	M	Methadone Toxicity			Cardiomegaly
ACCIDENT	041	B	M	Ischemic heart disease complicated by acute cocaine use			Hypertension
ACCIDENT	059	B	M	Acute Toxic Effects of Carbon Monoxide			
ACCIDENT	051	B	M	Combined Toxic Effects of Morphine, Hydrocodone and Tramadol			Recent Cocaine Use, Chronic Alcoholism
ACCIDENT	022	W	M	Toxic effects of cocaine and opiate use			
ACCIDENT	049	B	M	Pacemaker Dependent Cardiomyopathy Aggravated by Cocaine Use			Atherosclerotic Cardiovascular Disease, Cardiomegaly
ACCIDENT	045	W	F	Toxic effects of oxycodone and venlafaxine			Lung abscess with bronchitis
ACCIDENT	045	B	F	Toxic effects of cocaine use			
ACCIDENT	041	W	M	Combined toxic effects of oxymorphone, methadone, and alprazolam	(Amended)		
ACCIDENT	058	W	M	Acute ethanol toxicity			Hepatic steatosis
ACCIDENT	040	B	F	Combined toxic effects of meperidine and other drugs			Hypertensive cardiovascular disease
ACCIDENT	047	W	F	Morphine Toxicity			
ACCIDENT	061	B	M	Cocaine toxicity aggravating atherosclerotic coronary artery disease			Hypertensive cardiovascular disease
ACCIDENT	052	B	M	Hypertensive cardiovascular disease aggravated by recent cocaine use			
ACCIDENT	047	B	F	Hemorrhagic infarction of the brainstem	Cocaine toxicity		Hypertensive cardiovascular disease
ACCIDENT	056	B	F	Acute Cocaine Use Aggravating Organic Heart Disease			Chronic Obstructive Pulmonary Disease
ACCIDENT	037	B	F	Toxic Effects of Cocaine			
ACCIDENT	036	B	M	Cocaine toxicity			

Deaths Caused by Drugs, Poisons, or Chronic Abuse

MANNER	AGE	RACE	SEX	CAUSE_A	CAUSE_B	CAUSE_C	OS_COND

Procedural Summary

Total case reports received	2238
Non-human cases	12
Duplicate reports	4
Relics	0
Total human deaths reported	2222
Cases declined, natural death with certifier, or other county	819
Cases accepted for full investigation and certification	1403
Natural deaths	702
Homicides	182
Suicides	86
Accidents (excluding traffic fatalities)	274
Road-traffic related Accidental Deaths	121
Undetermined manner of death	36
Stillborn	2
On-scene death investigations	921
Bodies transported to the office	1405
Cases certified without bodily examination by MD	117
External examination (Views + External Exams) by MD	365
Complete autopsies by MD	1002
Partial (Limited) Autopsies by MD	1
Bodies examined by investigator, not MD	114
Total bodies examined by MD or investigator	1482
Certified death but autopsy performed at hospital	6
Cases submitted for toxicology	1212
2007 cases remaining unidentified	3
County burials on year 2007 cases	43
Exhumations	0
Organ, tissue, or cornea donation cases	33

Comments

The services provide by the Fulton County Medical Examiner go far beyond the routine duties of conducting death investigations. Some of these other services include:

- Testifying in court cases
- Participating on Child Fatality Review Teams
- Giving lectures and training sessions
- Providing a Forensic Pathology Fellowship Training Program
- Providing Death Investigation Internships and Clerkships
- Instructing Pathology Residents in Forensic Pathology
- Serving on State and National Committees and Advisory Boards
- Reporting Notifiable Conditions to the Health Department
- Reporting Applicable Deaths to Federal Agencies such as the Consumer Product Safety Commission, FDA, and the Drug Abuse Warning Network
- Preparing scientific articles and research Papers
- Participating in national organizations and their activities
- Preparing Press Releases
- Maintaining an office website
- Developing in-house databases
- Reporting unidentified decedents to NCIC and the Unidentified Decedent Reporting System
- Reporting relevant case information to national registries such as the National Association of Medical Examiner's Pediatric Toxicology Registry
- Providing forensic pathology and death investigation experience to medical students at Morehouse, Emory, and other Medical Institutions
- Participating in studies and programs conducted by the Centers for Disease Control and Prevention
