KINDERGARTEN

Fashion a Forest

Students discuss the differences between living and non-living things and ask questions to discover whether things are living or non-living.

Working together, the class will create a forest habitat including both living and non-living components.

GSE: SKL1

FIRST GRADE

Parts of a Plant

Students explore the basic needs of plants and the role that each different part of the plant plays in obtaining those needs from the environment.

Each student will create their own model of a plant showcasing each of its parts and their important functions.

GSE: S1L1

SECOND GRADE

Life Cycles

Students explore simple and complex life cycles and discuss the role of clean water in the life cycle of the dragonfly as well as many other animals.

Each student will complete a life cycle diagram and the class will reinforce concepts with a unique "memory" game.

GSE: S2L1

Book a program online, or contact **Amy Warnock** at **404.612.8006** or **amy.warnock@fultoncountyga.gov** with questions. If you are looking for a program on a specific water-related topic that is not listed here please contact us and we will do our best to accommodate your request.

3-5 SCHOOL OUTREACH 2022-2023

- **FREE** of charge and offered to public and private schools in Fulton County
- **40-60 minutes** long and taught at your school
- **Aligned** to Georgia Standards of Excellence
- **Interactive** and can be adapted to meet the needs of your group

THIRD GRADE

Paper Watershed

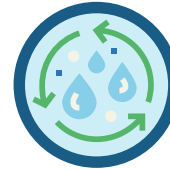

Students discover what a watershed is, which watershed we live in, and how our actions impact both the land and water around us.

Students will work in groups to create watershed models that will demonstrate how pollution enters and moves through a watershed.

GSE: S3L2

FOURTH GRADE

Incredible Journey

Students explore the steps of the water cycle and the physical changes that water goes through as it moves through the cycle.

Students will play an interactive game to explore the many paths water can take as it moves around our planet.

GSE: S4E3

FIFTH GRADE

Disease Detectives

Students discuss the importance of clean water and sanitation for public health and the advancements that have been made throughout history.

Students will work in groups and follow clues to discover the source of a mysterious illness outbreak in 19th century London.

GSE: S5L4
